EDUCATION

Bachelor of Science in Artificial Intelligence

2025 – 2029 (Expected)

University of Engineering & Technology (UET), Lahore

- Current CGPA: **3.4/4.0**
- Completed approximately **37 credit hours**
- Academic interests include Artificial Intelligence, Machine Learning, Software Development, Agentic AI, and Computer Science

Intermediate in Computer Science (ICS)

Completed: 2025

Government Graduate College, Sheikhpura

- Score: **87%**
- Major subjects included Computer Science and Mathematics.

Secondary School Certificate (Matriculation)

Completed: 2023

Muslim Model High School

- Score: **91.9%**
-

ACADEMIC & TECHNICAL INTERESTS

- Artificial Intelligence
- Machine Learning
- Agentic AI & AI Agents
- Full-Stack Web Development
- Software Engineering
- Cybersecurity

- Data & Database Systems
 - Emerging AI Technologies
-

SELECTED PROJECTS

Department Academic Management Portal

Full-Stack Developer

Developed a web-based academic management system designed for a university/college mathematics department.

- Built role-based authentication for administrators and teachers.
- Developed functionality for course and class management.
- Implemented student attendance recording and tracking.
- Designed systems for managing quizzes, assignments, midterm and final examination marks.
- Implemented automated student roll-number generation and academic record management.
- Worked with REST APIs, authentication, relational databases, and full-stack application architecture.
- **Technologies:** Node.js, Express.js, PostgreSQL, JavaScript, HTML, CSS, JWT, REST APIs.

Agentic AI Projects

- Exploring the development of AI agents and agentic workflows using Python.
- Working with modern AI development concepts including tool-using agents, workflow orchestration, and LLM-based applications.
- Building practical projects to strengthen understanding of autonomous AI systems.

Personal Blog & Web Platform

- Developed a responsive personal blogging website.
 - Implemented individual article pages, navigation, pagination, newsletter integration, and responsive layouts.
 - Worked with deployment, domain configuration, and email subscriber workflows.
-

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript

Web Development: HTML, CSS, JavaScript, Node.js, Express.js, MERN Stack, REST APIs

Databases: PostgreSQL, MongoDB

AI & Emerging Technologies: Agentic AI, AI Agents, LLM-based applications, AI-assisted development

Development Tools: Git, GitHub, Visual Studio Code, Postman, npm

Additional Knowledge: JWT Authentication, API Development, Database Design, Responsive Web Development, Full-Stack Development

CERTIFICATIONS

Google — Introduction to Cybersecurity

- Completed introductory training covering fundamental cybersecurity concepts.
 - Developed foundational understanding of security principles, threats, risks, and cybersecurity practices.
-

ENTREPRENEURSHIP & LEADERSHIP

TrackFit — Co-Founder / Chief Financial Officer

Co-founded an online clothing startup while pursuing my education.

- Contributed to financial planning and management.
 - Participated in marketing and business strategy.
 - Gained practical experience in entrepreneurship, teamwork, decision-making, and financial responsibility.
 - Developed an understanding of the challenges involved in building and operating an early-stage business.
-

LANGUAGES

- **Urdu:** Native
- **English:** Professional/Academic proficiency
